

# CAROLINA BONE & JOINT SURGERY CENTER CAROLINA FOREST *Conway, South Carolina*

The Carolina Bone & Joint Surgery Center occupies a strategic location in the Carolina Forest corridor. Located near the new Carolina Bays Parkway, this new outpatient surgery center is easily reached by patients throughout the Conway/Myrtle Beach area. The design of the center provides a highly functional setting for physicians, and a friendly, contemporary environment for the comfort of patients and family members. The new facility includes two orthopaedic operating rooms and two O.R.-sized treatment rooms for orthopaedics and pain management.

*Creating an enjoyable environment is important in health care facilities. Clearstory windows flood the post-op and nurses station areas with natural light. The central nurses station provides visual control over all pre-op and post-op spaces. The family reception area brings together dramatic geometry, classic furniture lines, and sunlight. An outdoor garden area is a special feature for families.*
