

DALTON IMAGING CENTER

Dalton, Georgia

Dalton Imaging Center was initially designed as a 6,000 square foot facility which includes R&F rooms, a CT. room and a nuclear medicine room.

The first phase of expansion of 2,000 square feet includes an MRI magnet, computer room, expanded waiting, and additional dressing rooms.

The second phase of expansion of 6,500 square feet includes, a new CT. room, a new PET room with hot lab, injection area, and recovery, a new nuclear camera room, a mammography and ultrasound suite with waiting and dressing areas.

The total imaging center is approximately 15,000 square feet serving the Dalton area and its surrounding areas.
