

# *WILLIAMS PLASTIC & RECONSTRUCTIVE SURGERY, P.C.*

*Dalton, Georgia*

*The architectural design of Dr Williams new building is a blend of traditional design elements with a contemporary detailing of materials.*

**Client:**

*Joel Williams, M.D.  
Dalton, Georgia*

**Project:**

*Medical Office Building and  
Outpatient Surgery Center  
6,300 s.f.*

This new medical office building and outpatient surgery center in Dalton is designed to provide for the growth of Dr. Williams practice, and to offer patients the convenience and comfort of medical office and surgery at the same location.

This new 6,300 square foot building provides medical office space to expand the practice. The surgical suite includes two O.R.s and all required support spaces. The building is planned so that staff traffic can move easily and efficiently between the medical office area and the surgery suite.

The Hunter Group Architects provided complete architectural and engineering services for the project.
