Cobb Hyperbaric Medicine

Helen Gelly, M.D.

This multi-suited office building adjacent to WellStar Kennestone Hospital was developed to provide office practice space uniquely designed for specialty medical groups. The Hunter Group Architects provided programming, design, and construction documents for the medical office suites throughout this 120,000 s.f. building.

These physicians' offices represent a broad spectrum of diagnostic, treatment, and surgical practices. The project also includes a shared Lab/Radiology suite. The Hunter Group Architects also designed the spaces for pharmacy and food service located at the building lobby.

Vascular Surgical Associates, P.C.
